

1. **Zadatak1** : Uociti gresku u kodu, ne prebacujuci kod u Eclipse. Ispravljen kod predati kao Zadatak1 u Google doc formi

```
import java.util.Scanner; //nismo importovali skener
```

```
public class Krug {  
  
    public static void main(String[] args) {  
  
        Scanner sc = new Scanner(System.in);  
  
        double r;  
  
        r=sc.nextDouble();  
  
        if(r>0){  
  
            System.out.println(r*r*3.14);  
  
        else{  
  
            System.out.println("Greska u unosu!");  
  
        }  
  
        } // zagrada treba da bude ispred else  
  
    }  
}
```

Ispravljen kod:

```
import java.util.Scanner;  
  
public class Krug {  
  
    public static void main(String[] args) {  
  
        Scanner sc = new Scanner(System.in);  
  
        double r;  
  
        r=sc.nextDouble();  
  
        if(r>0){  
  
            System.out.println(r*r*3.14);  
  
        }  
  
        else{  
  
            System.out.println("Greska u unosu!");  
  
        }  
  
    }  
}
```
